

**SUBSTITUTE SPECIFICATION**

**ABSTRACT OF THE DISCLOSURE**

In a method or system for processing of print data, a print data stream with print data of a plurality of print pages is generated wherein at least one first object property is associated with at least one region of the print pages.

- 5      The print data are processed wherein at least one part of the at least one region of one of the plurality of print pages of the print data stream is selected. At least one second object property differing from the at least one first object property is associated with the selected part of the region on each of said plurality of print pages of the print data stream. The print data of each of said plurality of print pages which pertain to the selected part of the region are further processed dependent on the at least one second object property.
